

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claims 1-13 (canceled).

Claim 14 (withdrawn): A vaccine or pharmaceutical composition suitable for application to the muzzle of an animal, containing a biologically-active material which stimulates an immune response, affects an endocrine function or provides a therapeutic function after distribution to the oral and nasal mucosa of the animal by the licking action of the animal's tongue in cleaning its muzzle.

Claim 15 (withdrawn): The composition of claim 14 wherein a palatability enhancer is added to the composition.

Claims 16-22 (canceled).

Claim 23 (currently amended): The method of claim 27 wherein said ~~veterinary~~ prophylactic agent comprises at least one preservative ingredient selected from the group consisting of antibiotics, antibacterials, and antifungal agents.

Claims 24-26 (canceled).

Claim 27 (currently amended): A method for treating a ~~livestock~~ bovine animal to achieve a positive effect on the health of said ~~livestock~~ bovine animal comprising:

applying at least a single effective dose of a prophylactic composition directly to the exterior of the ~~muzzle~~ nasal plane between the nostrils and above the upper lip of said ~~livestock~~ bovine animal,

wherein said ~~livestock~~ bovine animal distributes said single effective dose into its oral and/or nasal cavities to contact the oral and/or nasal mucosa when said ~~livestock~~ bovine animal cleans said ~~muzzle~~ nasal plane with its tongue,

wherein said prophylactic composition includes at least one prophylactic agent and a post-application identifier.

Claim 28 (previously presented): The method of claim 27, wherein said single effective dose is applied with a brush, roller or as a liquid spray.

Claim 29 (previously presented): The method of claim 27, wherein said prophylactic composition is selected from the group consisting of pastes, salves, and films.

Claim 30 (previously presented): The method of claim 27 wherein said single effective dose is applied via a carrier web.

Claim 31 (previously presented): The method of claim 27 wherein said prophylactic agent is a vaccine.

Claim 32 (previously presented): The method of claim 27 wherein said prophylactic agent is a pharmaceutical.

Claim 33 (previously presented): The method of claim 27 wherein said prophylactic composition further comprises at least one performance enhancing component selected from the group consisting of viscosity enhancers, aroma enhancers, sustained release agents, and adhesive enhancers.

Claim 34 (previously presented): The method of claim 27, wherein said post-application identifier is a UV or other non-visible dye.

Claim 35 (previously presented): The method of claim 27, wherein said post-application identifier is a light visible dye.

Claim 36 (canceled)

Claim 37 (currently amended): A method for immunizing a bovine animal comprising:

applying at least a single effective dose of an immunizing composition directly to the ~~exterior of the muzzle~~ nasal plane between the nostrils and above the upper lip of said bovine animal,

wherein said bovine animal distributes said single effective dose into its oral and/or nasal cavities to contact the oral and/or nasal mucosa when said bovine animal cleans said ~~muzzle~~ nasal plane with its tongue,

wherein said immunizing composition includes at least one biological agent and a post-application identifier,

wherein said post-application identifier is detectable on the exterior of said ~~livestock~~ bovine animal's muzzle nasal plane.

Claim 38 (previously presented): The method of claim 37 wherein said post-application identifier is light visible dye or a UV or other non-visible dye.

Claim 39 (previously presented): The method of claim 37 wherein said ~~antigen~~ biological agent is a vaccine.

Claim 40 (previously presented): The method of claim 39, wherein said single effective dose is applied with a brush, roller or as a liquid spray.

Claim 41 (previously presented): The method of claim 39, wherein said ~~prophylactic~~ immunizing composition is selected from the group consisting of pastes, salves, and films.

Claim 42 (previously presented): The method of claim 39 wherein said single effective dose is applied via a carrier web.

Claim 43 (canceled)
